

Putting the ultrasound

Beyond Performance and Value

Esaote's new ultra-performance MyLabTM9 eXP ultrasound system is designed to support a full range of shared service diagnostic imaging environments. Take ultra-control of your images with unique visualization tools, and view results with clarity and sensitivity to help make more informed clinical decisions. Experience the ultra-comfort of Italian-designed ergonomics and an ultra-easy user interface that increases productivity.

The MyLabTM9 eXP ultrasound system provides unprecedented power to drive more confident, better informed healthcare decisions without compromise, at an ultra-value.

Clarity, Colour, Contrast

We understand image quality is ultra-important to you. Our non-composite single crystal probe technology provides excellent image quality you can count on. Driven by the new Ultra-engine platform, the MyLabTM9 eXP ultrasound system delivers greater image clarity, colour, and contrast supporting your diagnostic imaging challenges.

The MyLab™9 eXP delivers stunning display quality for a superior, application-rich ultrasound experience empowering you to guide more informed healthcare decisions.

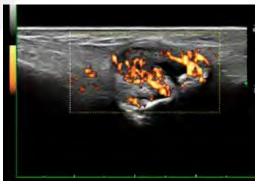

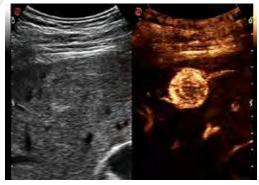

iQProbes Technology

Transducer design, quality of materials and manufacturing technology drive image quality. At Esaote's Transducer Center of Excellence in Florence, Italy, the team has optimized our scan converters, post processing algorithms and incorporated technologies to create an ultra-quality ultrasound transducer – iQProbe.

High-penetration abdominal imaging

• Enhanced colour Doppler sensitivity with Power Doppler • Contrast enhanced imaging (CnTITM)

Uncompromised Ease-of-Use

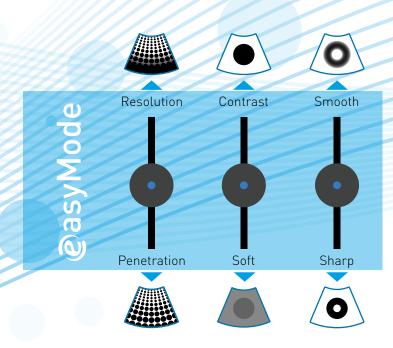

The MyLab™9 eXP system takes advantage of over 30 years of Italian engineering and design to offer an ultra-ergonomic experience, starting with its floating keyboard, tablet-like touchscreen and full HD wide format screen. Clinicians will also benefit from:

- easyMode* unique touch-tool for image optimization through intelligent real-time algorithms
- Opti-light integrated into the monitor to illuminate the room ensuring the best environment for optimal scanning
- appleprobe innovative design which reduces musculo-skeletal strain up to 70%, for better user experience and comfort in clinical practice

- Italian design
- Simplified control panel
- Eco-friendly

Performance without Compromise

The MyLabTM9 eXP is a state-of-the-art platform with a solid-state hard disk (SSD), last generation CPU/GPU unit, and Windows® 10 supporting the latest data security and processing power requirements. The quick boot-up and efficient stand-by mode make the MyLabTM9 eXP easy to unplug, and move from room-to-room without missing a beat.

Esaote's i-motion technology ensures the best image quality at the highest frame rate, even in the most challenging imaging modes.

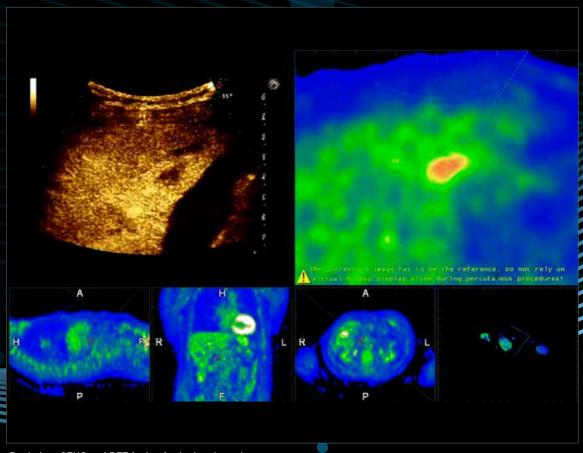

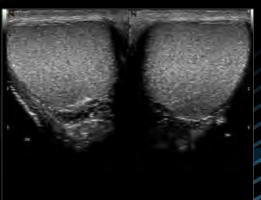

Ch

Virtual

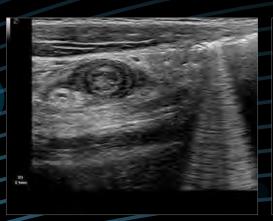

CT, MRI, PET side-by-side with real-time Ultrasound.

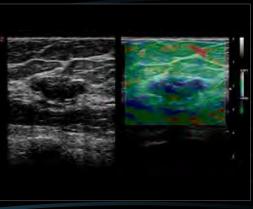

Real-time CEUS and PET fusion for lesion detection

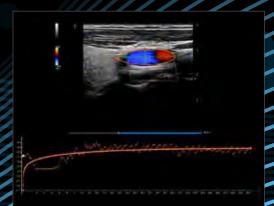

High resolution imaging in testis

XFlow Doppler enhancement in liver vascularization Axial view of appendicitis

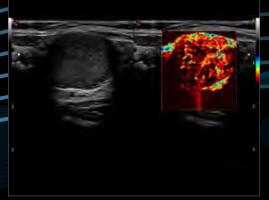

Dual ElaXto characterization on breast lesion

Q-Pack quantification capabilities on-board even with CFM

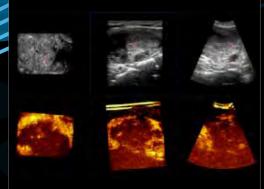

MSK BodyMap and real-time XFlow on X-Ray extremities

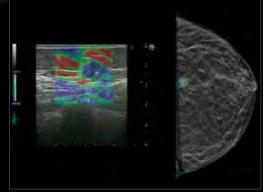

Advanced hemodynamic analysis in thyroid nodule with microV

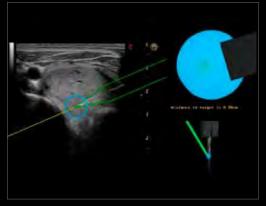

Q-ElaXto point Shearwave Elastography in liver

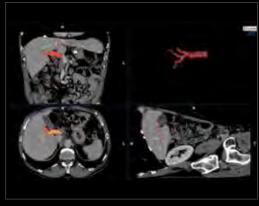

Pre-Post volumetric CEUS-multidataset comparison

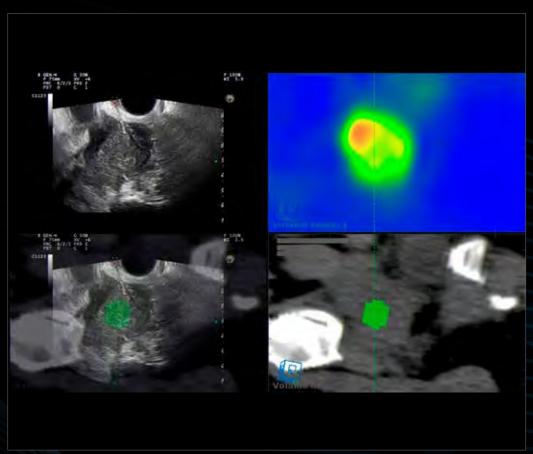

Breast BodyMap and real-time ElaXto in Mammo

Precise lesion detection and guidance with Virtual Biopsy

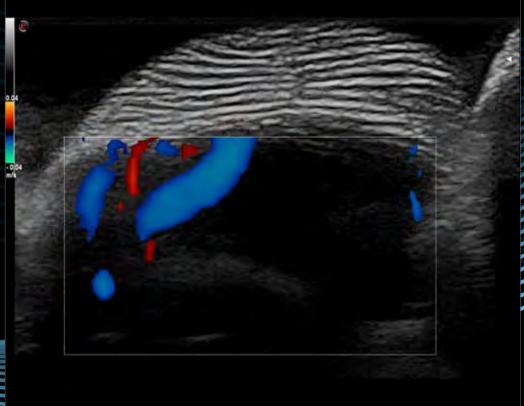

Virtual Navigator automatic vascular detection and segmentation with Auto-Fusion

easyTrace to maximize Doppler performance

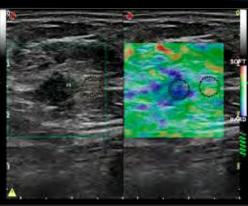

Real-time baby face with 4D imaging

Gynecology Fusion Imaging with PET for best lesion location

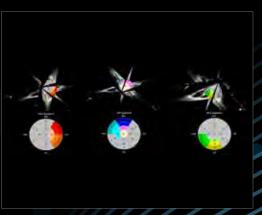

HD Zoom on fetus profile with Auto NT Measurement Elastography Advanced Measurement Package

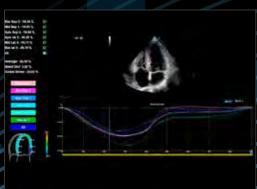

on breast lesion

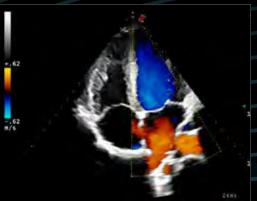

24MHz Imaging even on fingerprint with CFM

XStrain 4D technology for volumetric heart assessment by coronary territories

XStrain 2D speckle tracking technologies for global and regional function

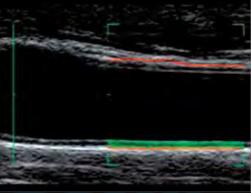

Ultra-sensitivity Colour Doppler for precise visualization Pulmonary veins

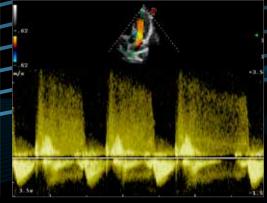

Xview real-time algorithm reducing speckle noise artefact in pathologies analysis quantification

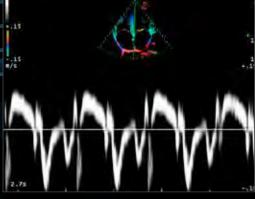

High Frequency MSK Imaging with HD Zoom

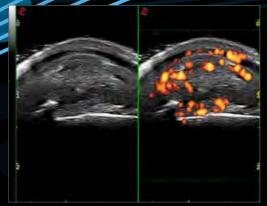

QIMT Intima-media thickness quantification based on radio frequencies in real-time studies

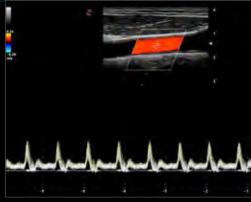

Advanced CW Doppler processing chain for Aortic stenosis quantification

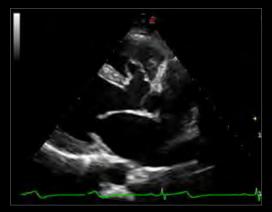

Tissue Velocity imaging to quantify septal velocity and dyssynchrony

Very-superficial Linear Imaging with X-Flow Dual Doppler Algorithm

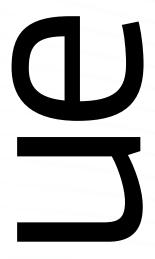

PW Doppler with easyTrace optimization

TEI harmonic imaging for clear visualization of Perimembranous Ventricular Septal

Ultra-sensitivity Colour Doppler in detection vertebral artery

Uncompromised Value

Developed to provide ultra-quality ultrasound technology to clinics, hospitals, and private practices, the MyLabTM9 eXP offers smart upgradability, long-term maintenance options and transducer compatibility.

The MyLab™9 eXP delivers unprecedented precision, power and capabilities to drive more confident healthcare decisions at an excellent value-performance in a globally connected environment.
