

ADDING VALUE

Manufacturers Independence

Collect data from probes and sensor systems produced by different manufacturers and integrate into a single Dashboard and deliver as a single presentation (via the browser) to the end user.

Web-based & Multilingual

Access to the available information, through a secure browser with user authentication (Tablet / Smartphone included), in the language you want, from anywhere in the world through an Internet connection.

Multiple Units of Measure

You can mix and match different units of measurement on the platform. The dashboard or graphic generator can display, at the same time, the various ambient temperature (°C or °F), brightness (Lux) and CO2 value in % or ppm.

Connections & Gateways

Can be connected to different physical media and protocols, as well as with other systems of alarm, quality and management of buildings. Non-conforming situations (Alarms) can be sent by Mail, SMS or Voice, depending on the options of the administration group. Validated and ready to meet FDA 21 CFR Part 11 compliance requirements and other normative documents.

SERVICES

Maintenance and Support

We realize that the world today is very demanding in terms of products that helps stability and growth in different market segments.

As such, a set of maintenance and support services is prepared to meet the demand for 24-hour services.

One of the most important is the assistance line included in the Gold maintenance contract (in English, Spanish and Portuguese).

Other available services

Planning, installation, customization and training services (local and remote) are available, upon request.

Software Development

Software development for new Collectors or Gateways connections is available, upon request.

Consultancy

Consultancy Services (both remote or locally) for complex environments are available, upon request.

SOFTWARE FOR MONITORING MEDICAL DEVICES & HOSPITAL ENVIRONMENT IN REAL-TIME

 24 x 7 real time monitoring

 new & existing systems integration

 web browser dashboard

 connections to Mail, SMS
& Alarm systems

 exportable data

SOFTWARE FOR MONITORING MEDICAL DEVICES & HOSPITAL ENVIRONMENT IN REAL-TIME

COMPLIANT HARDWARE

Communicate

Modular integration with:

- ◇ Quality, Security and Alarm Management Systems;
- ◇ Building Management Systems (BMS);
- ◇ Internet Services;
- ◇ Others.

SOFTWARE MODULES

Collect

Data from a huge variety of probes and sensor systems. Adding new ones is a simple and a very short time consuming process.

Probes & Sensors for:

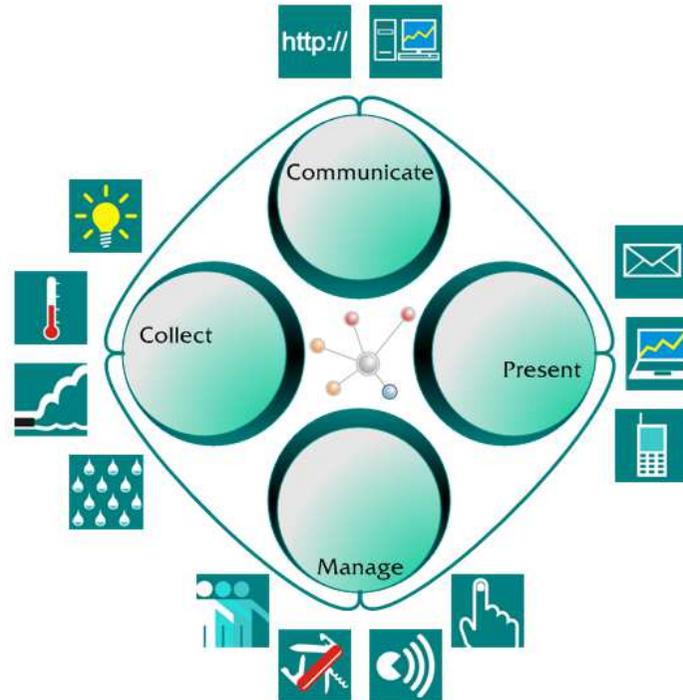

- ◇ Medical Refrigerators and Freezers;
 - ◇ Ultra Low Freezers;
 - ◇ Cryogenic Systems;
 - ◇ CO2 Incubators;
 - ◇ Operating Rooms;
 - ◇ Others.

Sensors Systems:

- ◇ SmartMeters;
- ◇ IAQ (Internal Air Quality);
- ◇ Remote Home Care.

Connections Type:

- ◇ Wire;
- ◇ Wireless;
- ◇ Radio communications.

Manage

- ◇ Management of Measurement Points, Users & Groups, Probes & Sensor Systems.
- ◇ Adjustments of the parameters of the critical limits of each probe & sensor system.
- ◇ Alarm justification by authorized users.
- ◇ Automatic Backups.
- ◇ SQL database with Historical and Audit Functions.

Present

Data as information in any user friendly device, gives the power to have better and quicker information and to take the right decision. Also it must have the ability to be interfaced with new types of devices as they become available.

- ◇ Web Dashboard Real Time Data.
- ◇ Status and Statistics.
- ◇ Search, Filter & View Data.
- ◇ Graphs & Tables.
- ◇ Offline Missions.
- ◇ Events, Incidents & Alarms.
- ◇ Events Warning Generator to managed distribution lists.
- ◇ Alarms by Email (SMS and Voice Call optional).
- ◇ Exportable Data.
- ◇ Sensors Calibration Report.
- ◇ Customized Reports.
