Small, lightweight and easy to use, the Alaris® GW syringe pump is a versatile volumetric pump specially designed to fit within the Alaris® Patient Care System.

## Guardrails® Suite

The Guardrails® Suite is a medication safety and quality auditing system designed specifically for infusions. It not only helps protect the patient and the clinician from the consequences of medication errors, it also positively affects patient outcomes by facilitating continuous improvements in the quality of practice.

## System Integration

When docked to an Alaris® Gateway workstation, your complete infusion system has the capability to link to Patient Data Management Systems (PDMS) and Hospital Information Systems (HIS) through our open network architecture.
