

Solar Smart

Portable Urodynamics

Solar Smart is a compact system offering all tools needed for cost-effective urodynamic and pelvic floor investigations.

The plug-and-play concept, combined with universal connectivity provides flexibility in configuring a system to meet your diagnostic needs.

- **Compact Moveable Pole System**

This slim diagnostic system built around a solid pole requires little space and can easily be moved near to the patient.

- **Office based Urodynamic Software**

All standard urodynamic investigations available. Easy to use, with standard protocols guiding you through the investigations. A database enables easy entry and retrieval of patient demographics.

- **Remote Operation**

Infrared remote control operates entire system from a separate location, allowing you to stay close to the patient. The complete investigation can be carried out by only one medical assistant, pushing 4 buttons.

- **Expandable for all future needs**

The Solar Smart can easily be adapted to both your current situation and your future requirements such as gynecology study, anorectal manometry, biofeedback, neuro-urology, video-urodynamics and network capabilities.

Solar Smart software running on standard Microsoft Windows® based PC
